Anti-Theft Features

	WHAT IT DOES
Remote Lock	Locks your lost or stolen device by a remote SMS command. After locking, no unauthorized person will be able to access data stored on your device.
Remote Wipe	Safely deletes all contacts, messages and data on removable memory cards. Advanced cleaning procedures ensure that it is not be possible to restore wiped data (Android 2.2 and higher).
SIM Matching	Lets you stay in control of your phone remotely, even when an unauthorized SIM card was inserted into your device. Trusted Friend will receive a wealth of information about the inserted SIM, including the phone number, IMSI and IMEI codes.
Trusted Friend	Trusted Friend is your help in the event of mobile phone's loss or theft. Initially, you set up one or more Trusted Friend phone numbers.

Security Features

	WHAT IT DOES
SMS/MMS Antispam	Filters out unwanted SMS/MMS messages. Allows you to define your own trustworthy contacts via blacklist/whitelist or simply block all unknown numbers.
Real-time Protection	Protects all applications, files and memory cards with the ESET NOD32 proactive technology optimized for mobile platforms.
Security Audit	An on-demand security audit checks the status of all vital phone functions, including battery level, Bluetooth status, device visibility, disk space and running processes.
On-access Scanning	Advanced scanning protects your device from threats attempting to access the system via Bluetooth, Wi-Fi or Infrared.
On-demand Scanning	On-demand Scanning provides reliable scanning and cleaning of integrated memory and exchangeable media. Scanning of specific folders is also supported.
Firewall	Monitor all incoming and outgoing communication based on your defined custom rules. If you wish, you can automatically block data while in roaming to keep your phone bill under control.
