

MOBILE SECURITY

ENJOY SAFER TECHNOLOGY™

MOBILE SECURITY

It protects you when online browsing on your mobile or tablet, as well as your physical device in case it gets lost. Stay protected when you connect for social networking, shopping and more. Enlist the powerful Antivirus, Anti-Phishing and proactive Anti-Theft protection. The product is available in both free & premium version, the latter offering a richer set of features.

Keeping You Safely Connected with Antivirus & Anti-Phishing Protection

Enjoy your time online wherever you connect, knowing that you are protected. Steer clear of malicious websites and foreign interference. Rely on proven NOD32 technology to make sure that the apps you download are safe and to unmask potentially unwanted applications. With Anti-Phishing, safely avoid fake websites designed to snatch your personal data.

Real-time Scanning	Ensures that all apps and communication are screened for malware. You stay well-protected against online and offline threats, even USSD code attacks (a protocol used by GSM phones to talk to the service provider's computers).
On-demand Scanning	Whenever you suspect foul play, run a scan on your phone. It takes place silently in the background, without interrupting your ongoing activities. Access logs and detailed scan results to check for detected threats.
ESET Live Grid	Ensures real-time protection against emerging threats by using in-the-cloud technology collecting malware samples from ESET product users from all over the world.
Detection of Potentially Unwanted Apps	Uncover apps that may do harm by exploiting your phone's data or functions. Early detection shields you from attempts to send SMS or make calls to premium numbers.

Premium Features

Anti-Phishing	Protects against malicious websites attempting to acquire your sensitive information – usernames, passwords, banking information or credit card details.
Apps Permissions	See the permission levels of all your installed apps – all organized into groups. Know which information on your phone or tablet they can access.
Scheduled Scan	Schedule a regular scan for malware when it best suits you – during nighttime if you want.
Quarantine	All the threats that are detected are moved to quarantine where they cannot do any harm. You can decide to keep them there, delete or remove them.
App Lock	Keeps your applications safe against unauthorized access.
Automatic updates	Constant updates of your virus signature database.

Proactive Anti-Theft: Control Your Missing Phone Via my.eset.com

Rely on nifty features that help you protect and find your phone in case it goes missing.

Premium Features

Proactive Anti-Theft	It acts when it detects suspicious behavior. If incorrect Screen lock (PIN, pattern, password) or unauthorized SIM is inserted, device gets locked and snapshots from phone cameras are automatically sent to my.eset.com. The information includes the phone's location, current IP address, inserted SIM details and other data. The user can mark the device as missing at my.eset.com and start Location tracking or send Custom on-screen Message or even Wipe the device contents.
Custom On-screen Message	Send a custom message to the missing device to contact the finder. The message will appear on screen even when the device is locked.
Location Tracking	When the device is marked as missing, the location is regularly sent to my.eset.com and displayed on the map, helping you track its position in time. If the device's location changes, its location is sent to my.eset.com for up to date tracking.
Camera Snapshots	Snapshots are automatically and regularly sent from the phone's front and back camera to my.eset.com if the device is marked as missing. This helps to identify its location or its finder.
Low Battery Alert	When the device is low on battery, its current position and camera snapshots are automatically sent to my.eset.com before the device shuts off.
SIM Guard	Lets you stay in control of your phone if it goes missing. Your device will be able to receive remote commands even if an unauthorized SIM card is inserted. Your pre-defined Trusted Friend(s) will receive the inserted SIM's phone number, IMSI and the device's IMEI code.
Anti-Theft Optimization	Fine-tune the Anti-theft web interface for the best Anti-Theft functionality, increasing your chances of retrieving a missing device.

Free Features – SMS Commands

All SMS-activated, these features give you a degree of control over your missing phone by sending SMS from any device.

Remote Lock	Allows you to lock the phone remotely, preventing unauthorized access to all your stored information photos and emails.
GPS Localization	Remotely locate your missing phone by tracking its GPS coordinates using a remote SMS command.
Remote Siren	Helps you find your phone by activating a siren sound on your device, even if it's set to mute. In premium mode, the siren can be activated also via my.eset.com

Your Calls Made More Secure & Convenient

You don't have to put up with unwanted calls anymore. Now you have the tools and flexibility to block whoever you want, whenever you want it.

Premium Features

Call Filter	Only receive calls you want. Determine contacts and the time of calls, including the option to block the last caller altogether.
Time-based Blocking	Block calls during specific times, while allowing exceptions for family and friends.
Call Blocking	Blocks calls from a specific user or user group. Use your Android contact groups – family, friends, work – to apply rules for each group. Or you can block all calls from hidden numbers.
Block Last Caller	Block the last caller and prevent future calls from this number. It's easy, quick and puts an end to unwanted calls once and for all.

Tablet User Interface Support

The new tablet-friendly user experience gives you easy access to loads of security functions.

Tablet Support	The design is responsive to tablets, horizontally and vertically.
Small Updates	Small security updates ensure that you always have the latest protection, without slowdowns or increased mobile data consumption.
New Interface	Designed to complement your Android experience, it puts all the security functions right at your fingertips. You stay informed about all important issues so you can stay safely connected.
