> "We consider securing mailboxes a standard service that comes with freemail. The users of workstations in our company network appreciate the fact that ESET Endpoint Security does not slow down the system. Our IT department greatly values the ESET Remote Administrator tool for remote installation and configuration."
>
> *Pavel Zima, CEO in Seznam.cz*

THE CUSTOMER

Seznam.cz is the most visited catalog search engine in the Czech Republic. Ever since its foundation, Seznam.cz had a clear vision: *"To become the most popular place on the Czech Internet, where the users can find help and solutions to their problems, educate themselves and have fun."* The aim was for the portal being synonymous with "search engine" and starting point for exploring the Internet for millions of users in the country.

Currently, more than 6.2 million active mailboxes are being hosted by Seznam.cz as a freemail service – more than by any other freemail provider in the Czech Republic.

THE CHALLENGE

In order to secure the servers providing freemail services, as well as the company network of workstations, laptops, and servers, the company has placed a request for proposals for an antvirus solution.

The key requirements by Seznam.cz:

- Top detection of all types of threats.
- Low demand of the antivirus solution on the Seznam's employees' computers and laptops
- 100 % protection of millions of users' mailboxes
- High-performing antivirus protection capable of controlling upwards of 100 incoming and outgoing emails each second
- Comprehensive remote administration of the product

THE SOLUTION

Based on the results of the request for proposals, ESET Mail Security for Linux was chosen to protect mailservers hosting free mailboxes of millions of users.

Based on the positive experience with mailserver protection from ESET, Seznam.cz subsequently ordered a second batch of licenses to protect workstations within the company network.

Currently, Seznam.cz runs two licenses of ESET security solutions: ESET Endpoint Antivirus covering 950 endpoints in addition to ESET Mail Security for Linux that eliminates spam and email threats on the company's mailservers.

ESET Endpoint Security

Safeguard your company data with multi-layered protection from an antivirus pioneer

Safeguard your company network with ESET Endpoint Security – a solution that protects your data on multiple layers. The legendary NOD32 antivirus, two-way firewall, web control and remote administration stand in the first line of defense against threats.

ESET is a global provider of security solutions for businesses and consumers, protecting millions of users around the world. Our proven technology holds a 10-year streak of VB100 Awards, unparalleled by any other security vendor.

Proven. Trusted.
Over 100 million IT pros & users have made ESET their security provider of choice.

Virus Bulletin Award
The only vendor with record-breaking protection. ESET proven to keep you safer.

3 GOOD REASONS TO USE ESET ENDPOINT SOLUTIONS

BUILT TO BE LIGHT AND EFFICIENT
The unique build of ESET Endpoint Solutions with focus on small system footprint has been optimized to perfectly match any system environment, ensuring fast startup and smooth performance while delivering a consistent level of security.

REMOTE ADMINISTRATION
Manage the security across thousands of endpoints from a single console. Take advantage of features such as randomized execution of selected tasks to load balance tasks on the network. In addition, real-time web dashboard displays critical information about network security.

CLOUD-POWERED REPUTATION
ESET Endpoint Solutions deliver advanced protection to company endpoints. The proven ThreatSense® scanning engine combined with ESET Live Grid® optimized scanning based on whitelisting of "safe" files delivers precise detection of malware, making the solution highly effective against emerging threats.
